Jen, I think we can get some outline points over to the CPG to help facilitate tomorrow's call.

I think this will be a primary item on today's status call @ 2:00

Hey Scott,

What I was hoping is that we could give them feedback on our call tomorrow about any gaps we see in their presentation. It would be helpful if we could get a rough sketch of what the teams feels those are.

I will also want a list of some the issues we see with the CPG's proposal (i.e., bathymetry). That will be a component of our discussion with Karl G. and some of the CSTAG folks. I will want to provide a brief outline on those issues to Karl G. et al., in advance of our call with them on 12/4.

I'm briefing HQs on the interim proposal now, but should be out by 11:30-noon if you want to discuss.

**Subject:** Delivery of comments on CPG's presentation

Jen, I know last Wednesday we were talking about getting some comments out to the CPG today. I didn't realize or forgot that we were meeting with the CPG regarding their presentation. I would rather holdoff giving them our comments until Tuesday so we can share them with Michael and discuss them prior to sending them on to CPG.

And now with the write up in hand we have something else to consider.

Thanks
